

Linework
[lain-w3rk]

COMPANY PROFILE

LINEWORK.APP

2025

A NEW WAY OF DECENTRALIZED FINANCE

Since 2020, Linework has imagined a complete and decentralized ecosystem at the service of financial inclusion, providing business and growth opportunities on a personal and professional level.

The application of Linework through its technology allows simplified access to the use of digital assets on tangible markets in Europe, the Middle East, Asia, Africa, North, South and Central America.

We believe in the ethical principles of business and opportunity, of economic sustainability and we apply them in relationships with our users, in production activities, in the development of new products and in eliminating social constraints.

We create **environmental sustainability** and we apply them in the relationships with customers, in production activities, in the development of new products and in the choice of suppliers for the marketplace management.

OUR ROOTS

Linework was founded in 2020 by Noel Damien Foti and Benoit Foti.

Since the beginning of the business, Linework has represented **a safe reference for its users** by carrying out every new activity on the blockchain ensuring security in transactions and operations in the markets of goods and services, and in the protection of both the seller and the buyer on the blockchain.

From the early years of activity stands out for its great ability to expand into numerous markets thanks to competence, quality of application and the ability to precisely match the demands of decentralized financial markets with those of classical finance.

Linework strongly believes in the human capital and promotes training and talent enhancement.

Product development is entrusted to the experience and competence of technicians who work closely with the customers using the most advanced design, simulation and testing technologies.

When the projects are strongly innovative, Linework also relies on advice from prestigious universities, including the Polytechnic University of Milan.

As main contractor, Linework provides technical input to ensure the best solutions are chosen, provides for the economic assessment of the job, integrates products and equipment conforming to the regulations and certifies compliance of the complete system.

Linework designs, tests and manufactures all plant products and systems entirely in its own factories and always guarantees maximum competitiveness, reliability and prompt deliveries in 178 countries.

OUR LOCATIONS

In Italy we have a representative office where Linework was born, in the town of Montecorvino Rovella, in the province of Salerno where **164 private investors** came together to create the first company that creates a synergy between blockchain technologies and human evolution.

📍 USA:

- New York: Linework Media & Ope.
- Miami: Linework Offices

📍 El Salvador:

- Linework Offices

📍 Italy:

- Linework (OP) Production Plant
- Local Units: Olvevano Sul Tusciano

📍 Nigeria:

- Linework Offices

📍 Vietnam:

- Linework Offices

COUNTRIES WHERE WE OPERATE

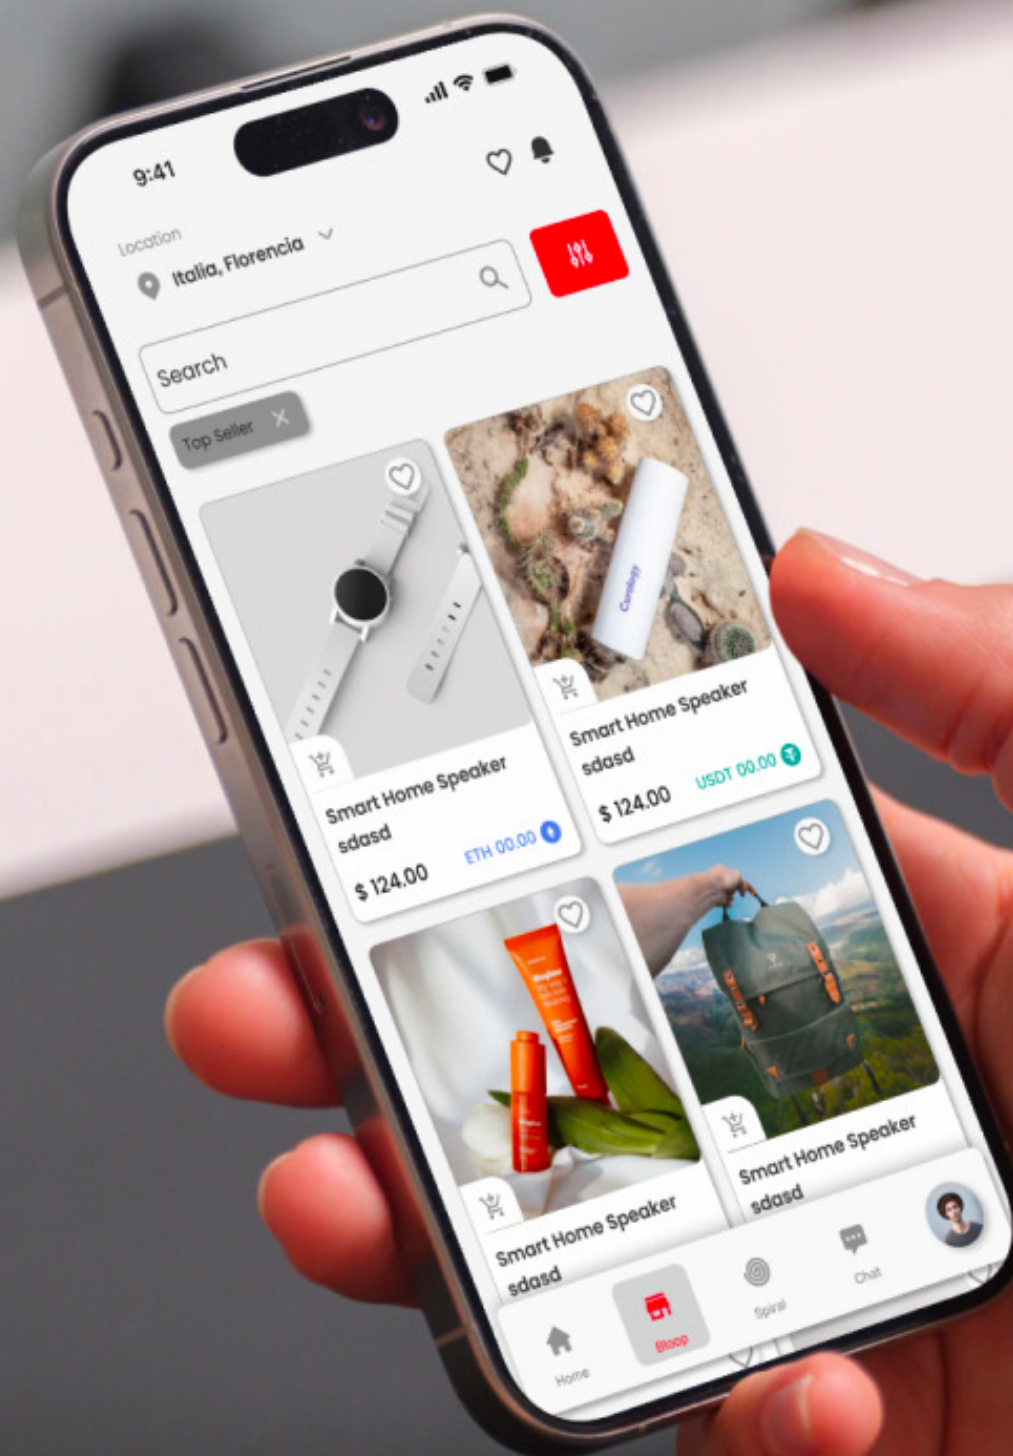

We operate and provide products and services in multiple sectors and have built plants and projects in numerous rural areas and infrastructure projects.

With our branches and partners, we are present in Europe, the Middle East, Asia, Africa, South America, Central America and United States.

TECHNOLOGY

All technologies processes comply with the following systems:

- Buy & Sell goods and services with digital assets
- Decentralized chat system in-app
- DeSoc – decentralized social network
- Internal wallet compatible with almost third party

SUSTAINABILITY

The organization of production at Linework technology is based on processes and software that respect the blockchain rules relating to user needs.

Based on a multi-layered economic model, Linework has brought together 4 of the most powerful business models in the world which are that of Amazon, that of Facebook or X, that of Ebay, that of Whatsapp and that of Coinbase at the same time.

The model allows anyone without limits and constraints to be a seller and buyer of goods and services at the same time, at the same time communicating in private and secure chats and communicating without borders and without having to face upfront costs to develop their business.

Thanks to the power of decentralized finance, the user also has the possibility to contract both B2B and B2C financing, create a business network, manage his collaborators in a decentralized way and increase his profits without ever having to deal with a banking relationship.

The internal wallet interface system allows the user to always be anonymous, operational immediately, use his cryptocurrencies as well as cash in the proceeds of his crypto sales and use them in the traditional market to buy shoes, bread or household materials via the in-app marketplace.

APPLICATIONS AND AREAS OF USE

Linework, operates in numerous application fields, including marketplace chat, payment system in physical stores, social media, advertising, sponsors, buy to gain, decentralized business management.

The products are widely used in many sectors including energy production and distribution, industry, oil & gas, petrochemical, naval, transport, infrastructure, chemical, pharmaceutical, research, food, textile, etc.

SECURE DECENTRALISED TECHNOLOGY

For over four years Linework has put on the market **a fully decentralized application that accepts 360 interoperability with all external providers** (external wallets and enabled Exchanges) with which it interfaces without ever coming into direct contact.

During the purchase process, it guarantees both the buyer and the seller a secure and identifiable decentralized transaction that puts the user safe in an environment that is not safe by nature.

Many users own crypto assets, often in large quantities, but do not feel safe spending them. Linework has created an integrated, secure, decentralized environment that guarantees all parties during transactions, facilitating the use of cryptocurrencies and their democratization.

SAMPLE OF USE

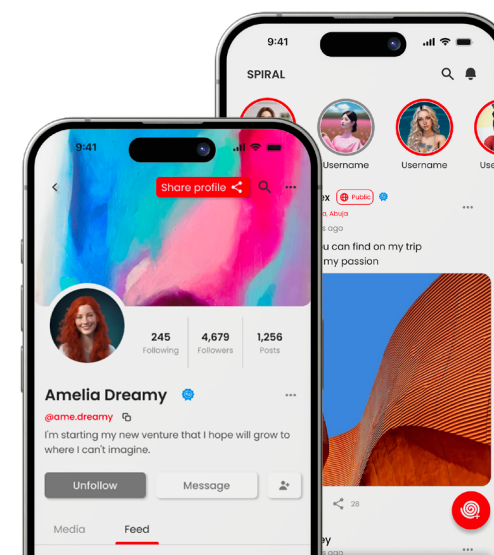

- Sell in-app goods and services with in-app crypto assets
- Transfer of in-app assets between users
- Creation of the decentralized store and control of worldwide deliveries without borders
- Management of in-app advertising, advertising of the store, of products, targeting of in-app markets with payment for features always in crypto assets.
- Decentralized in-app chat system
- Wallet at the center of the ecosystem as the arm of the application operation
- In-app virtualized assets for greater asset security.

Nigerian Rally – Benin City University

MAIN ACTIVITIES IN EMERGING COUNTRIES

- Access to blockchain technology and Financial education for individual growth
- Financing of university courses in El Salvador and Nigeria
- Access to in-app financing with no interest rates
- Sponsorship of local events for the promotion of culture and biodiversity
- Access to technological instrumentation through decentralized finance and optimization systems
- Digital tools for opening native economic and mass trade markets in a playful way.

Linework provides comprehensive DeFi solutions

that integrate current “market” and “social” technologies into the DeFi world, making them more efficient and accessible to people globally, regardless of their professional or social position, wealth, or minority status

- Like Amazon, Linework offers a global and powerful marketplace. Like Uber, Glovo, or Just Eat, it provides delivery services worldwide, including in areas where Amazon or Uber do not operate (80% of countries).

- Like PayPal, Linework offers smart instant payments without boundaries. Like Facebook, users can interact socially, and like Instagram, they can share their lives with stories and other features.

- Like Twitter, users can tweet anonymously and publish content freely without censorship or threats. Similar to Binance or Coinbase, users can monitor digital markets, swap, use, or liquidate assets within their bank account, or use digital assets to purchase goods and services directly in the marketplace.

- Like WhatsApp, Linework allows secure messaging without relying on mobile phone or telecommunication networks, and users can create private or secret groups.

In summary, **Linework combines all the common technologies and software in a user-friendly manner**, connected to the entire DeFi world. Users can buy and sell with digital assets using the Linework App, with Linework Coin, and various other crypto assets. Interact, publish, trade, pay, deliver, create a store, and advertise freely worldwide. Be yourself for the first time in the digital world.

- Linework provide a marketplace that allows without any bonds or obligations the possibility to market their products and services. The Marketplace has different functions for seller and buyer side. Starting with the more compress part that is seller side.

- The App gives the possibility to Either be a Buyer or a seller.

- To be a seller and place your goods or services, you will have to switch to seller mode – user have just to click on the button Switch to seller mode inside the main menu.

The seller has option to have a free (Basic) account and start to sell with 0 expenses.

However, there are 3 more types of seller profile that have costs and will help seller to have better control of their shop.

SUBFEATURES

Linework, Inc (USA) has created a series of sub-functions within the application that allows the user a multi-factor experience by focusing on a single user (username) connected to a single wallet to be able to operate in all the sub-sections of the application.

The user who wishes to create an online store can create the store in just a few clicks, publish his products online immediately, select the currencies in which he wishes to be paid and advertise his contents via the social network accessible in-app. Without ever leaving the app, the user can cash in, publish, reuse their assets to buy other goods and services, advertise,

transfer money to other users in the app or bank their assets through external suppliers connected in-app.

THE LINEWORK GROUP

- Democratization of blockchain technology.
- Creation of a proprietary and patented technology on a global level with its own strong, easily recognizable identity.
- A private group backed by 164 private investors for a paid up capital stock of \$66,069,114.00 representing 25,027,389.00 shares for a par value of \$2.63.
- Linework is a large group operating in 52 countries, listed on the Apple Store and Google Play, about to be listed on the New York Stock Exchange on the NASDAQ by the end of 2025.
- An autonomous system, accessible and

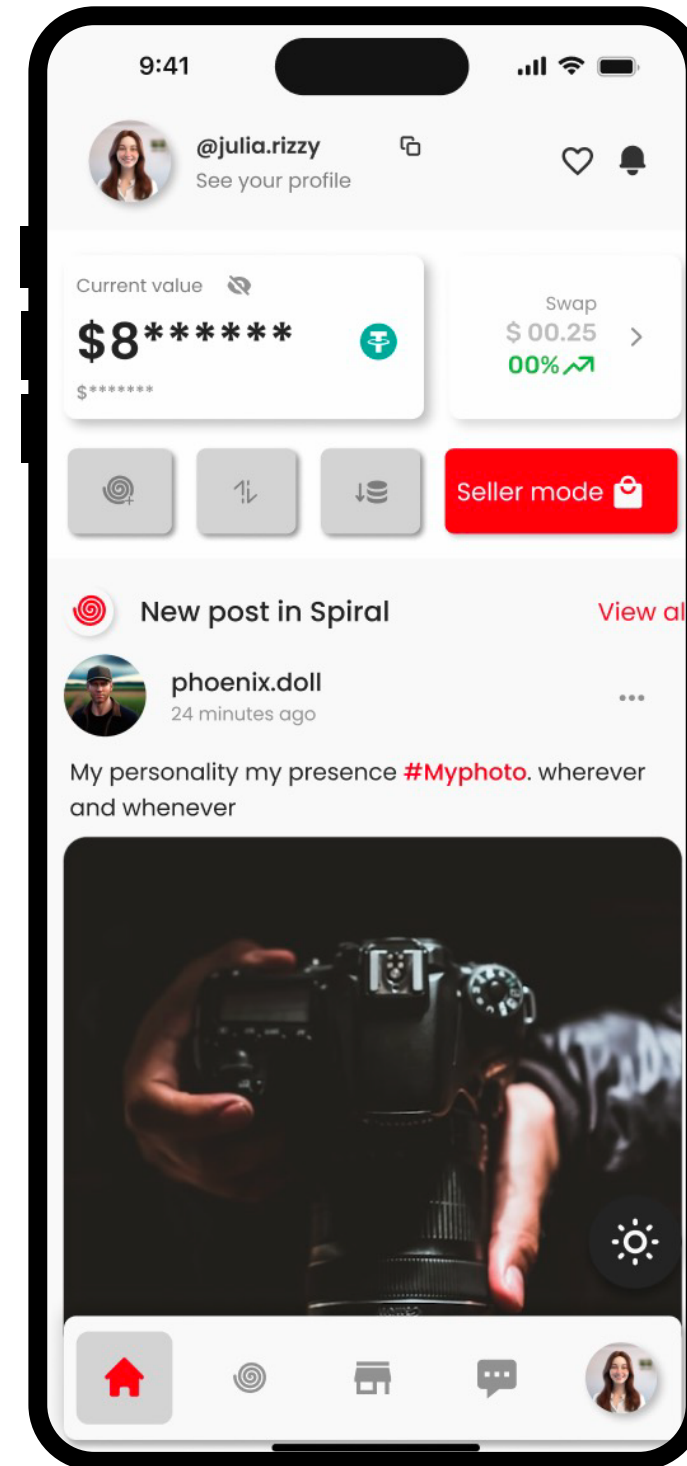

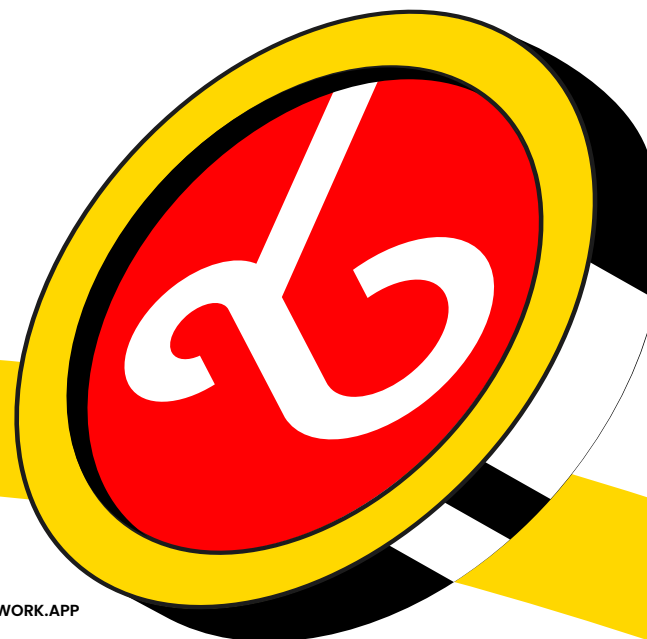

Photovoltaic Plant - Industrial Plant built by our partner SAIE

democratic to anyone entering the world of blockchain.

- Creation of blockchain-based financial conditions that offer the freedom to expand and start from scratch.
- The Linework group has decentralized, efficient, proactive management and is supported by exponential growth.

OUR SERVICES INCLUDE:

- Access to decentralized finance
- Opening of a digital store
- Purchase of products and materials
- Creation of electrical supplies
- Freedom to undertake
- Access to digital financing
- Access to biodiversity
- Transform a local store into an international trading powerhouse instantly
- Hot water supply
- Civil works
- Start-up financing
- Assistance and maintenance services
- Training

User Interface - main page of the app version March 2025

RENEWABLE ENERGY WITH LINEWORK

Linework is a business growth vector for industrial electricity production operators. Linework through international operators and installers of in-app photovoltaic and renewable source panels allows the development of this technology for private individuals and businesses.

Thanks to the experience of our partner SIAE, Linework offers the co-financing of the installation of private electricity production through Bitcoin, Ethereum or USDT packages payable in installments.

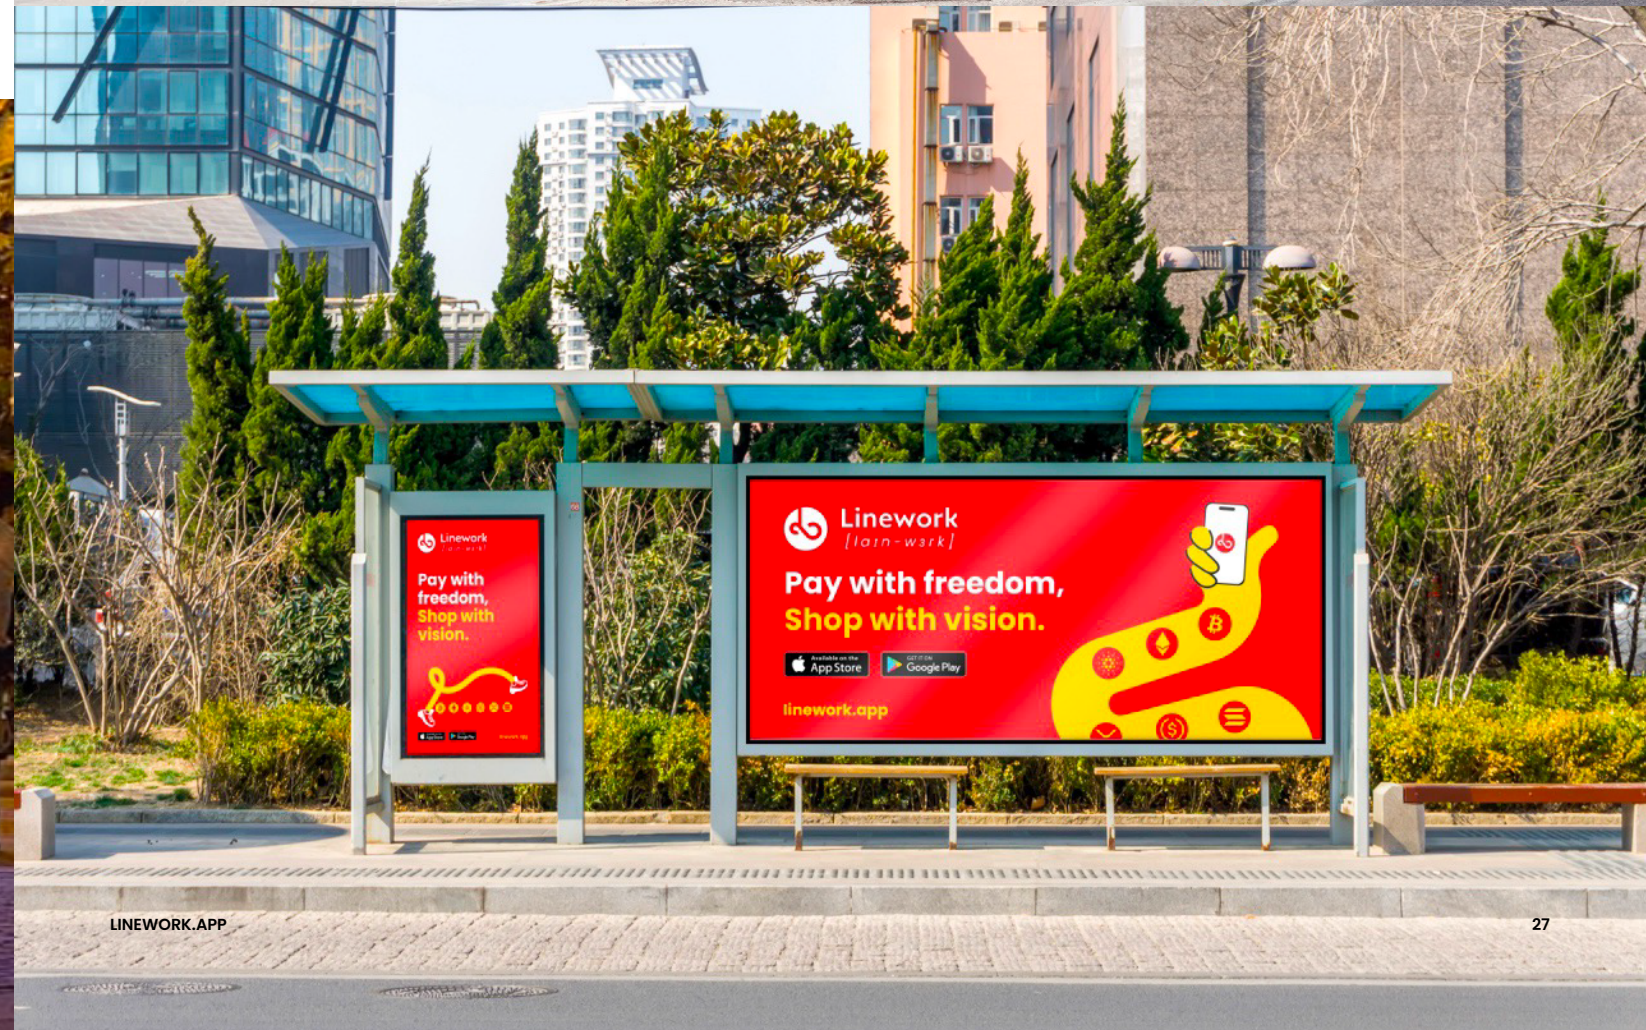

Linework is also involved in projects for the development of financial education and access to natural resources in El Salvador, Italy and more generally in Central America and Europe.

The aim of Linework is to promote access to environmental natural resources to the greatest number of people in developing countries, through decentralized finance tools.

Linework represents a true pillar for the demographic and economic evolution of peoples by giving unique access to alternative finance, the provision of infrastructure and access to primary nutrition in the most remote territories.

CONTRACTS EXECUTED

- ✓ Electricity supply in withdrawn or unfavored areas.
- ✓ Provision of hot water in withdrawn countries where water is not accessible.
- ✓ Finance university and professional study courses for young people in withdrawn or growing countries.
- ✓ Promotes hygiene and access to natural resources, water or food natively without intermediaries
- ✓ Promotes industrial growth and community development as well as the global economy in emerging countries.
- ✓ Create environmental and bioecological structures or bioindustry in growing countries.
- ✓ Democratize access to decentralized finance and its power.

FINANCIAL FREEDOM AND INSTRUMENT CALIBRATION

In the field of financial freedom and instrumental calibration, Linework, Inc (USA) offers global services without ever having a connection with traditional banking systems.

Linework's economic model is such that it brings together the model of the big-4 (Amazon, Instagram, Coinbase, Whatsapp, eBay) since within a single application the user at the center of the Linework experience becomes a bankable user in the 4 business areas.

Financial freedom lies in the fact of being able to access alternative, unrestricted and operational instruments even in times of war, difficulty, blackout of the traditional banking system and protects the user from market variations and governmental difficulties for those living in a theocratic or dictatorial country, guaranteeing freedom of expression, growth, training and development.

DEFI USER PROTECTION IN A INSECURE WORLD:

- ✓ During the purchasing process, Linework protects the user with a “multisig” system and outgoing asset compliance control with “human” control of outward transactions.
- ✓ The user’s virtual asset is not moved but passes through the Linework smart contract at the time of Pay-In or payment.
- ✓ When the user purchases on the marketplace, the digital asset is seized by Linework until the transaction is completed and the goods are received by the customer.
- ✓ A security “deposit” is provided to guarantee the seller as well as the customer throughout the transaction process.
- ✓ Linework is responsible for and protects transactions that remain anonymous to those outside the system.

WHAT DOES LINEWORK OFFER?

- Linework has designed a technological model that makes a transaction on the blockchain safe since those who sell as well as those who buy necessarily have an active in-app user.
- An active in-app user has necessarily activated in-app traces that make him identifiable
- Products sold in-app as well as online businesses are subject to compliance and compliance validation according to the terms and conditions of in-app sales.
- Pricing plans allow you to manage an online shop professionally or simply privately.
- The system includes logistics and delivery with various partners such as DHL, UPS or customize its delivery zones independently, monitor your business in real time and have sales statistics in various countries.
- An integrated and structured platform around Decentralized Finance.
- Access to in-app purchase lines payable in installments like a classic loan for both individuals and businesses and the purchase of machinery.

THE LINEWORK ECONOMIC MODEL?

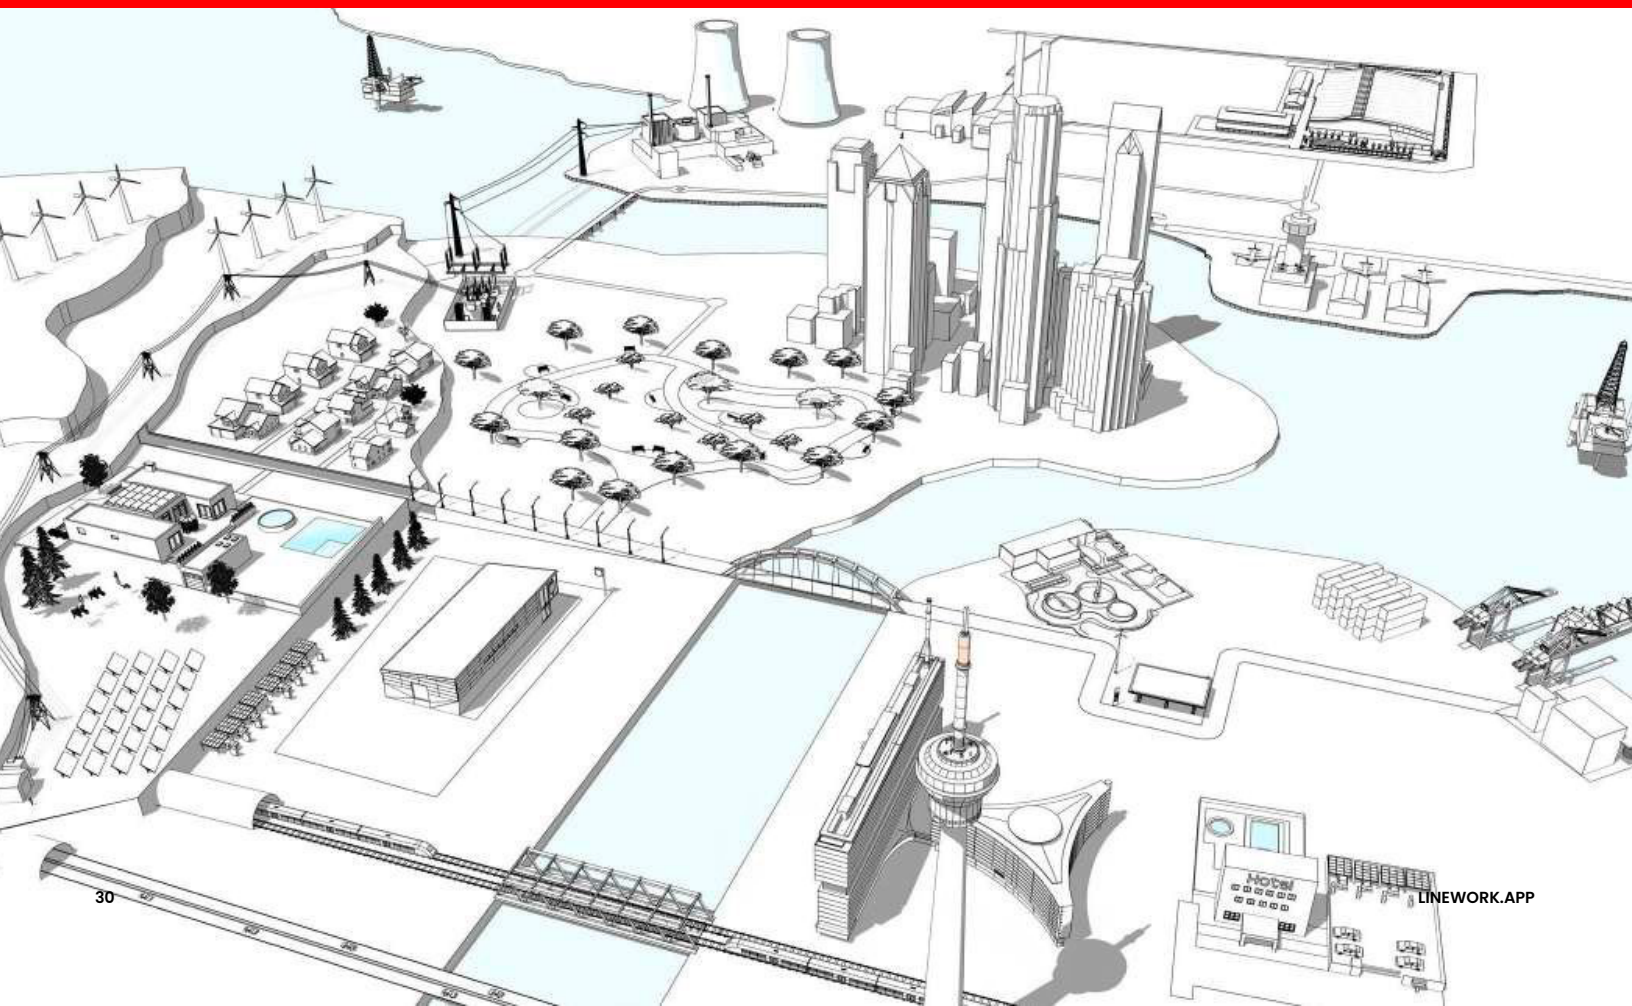

- The economic model of social media (ads, internal ads, external ads, verified profiles, user capitalization).
- The economic model of a marketplace with operating margins on goods and services, online store ads, product ads, in-app ads, monthly pricing plans, network commissions and percentage of online store turnover.
- The economic model of a classic bank applying network commissions, asset transfers, asset custody, use of internal or physical store payment functions with commissions.
- The economic model of private messaging with ads, private and secret or public groups.

PRODUCTS

Linework has gained great experience in designing user integration solutions at the center of the decentralized economy.

Linework technology is proprietary, does not call upon external code structures, does not collaborate with third parties, and does not share technology space with third parties; therefore, Linework app is compatible with 100% of the Web3 providers existing on the market without limits or borders which contribute to the industrial expansion.

Linework's products are unique, pioneers on the web3 market as they are the only one to guarantee retail market operations between decentralized finance via assets and the traditional tangible market in a safe and native way

SOCIAL NETWORK

The Social Network.
DeSoc

The first decentralized social network.

A decentralized Social Network a game changer and a way to target your market, publish without boundaries and advertise immediately worldwide without need previously to get friends or any connectors. It's possible to get advertised or verified, participate to buy to gain an earn digital asset promoting goods.

Linework DeSoc (Decentralized Social Network) is the place to be for safe surfing on social media, getting safe for your children.

Financial aspects Others products

INTERNAL WALLET

The internal wallet is at the center of the user experience, directly connected to the user and the various features of Linework.

It allows people to pay online or in physical stores, instant transfer or finance a business, buy food, goods or infrastructures.

BADGE VERIFIED

Possibility to get verified and access to different hidden features in-app. Becoming a moderator, and get involved in the global community.

Possibility to target your market, country or community freely without constraints.

Linework app è un operatore multi-marchio globale e al servizio dell'utente nel settore retail

Linework app is a global multi-brand operator serving the user in the retail sector.

¡Linework llega a El Salvador! Vender, comprar y financiarse sin bancos ya es posible

La fintech internacional Linework anuncia su llegada a El Salvador, introduciendo una app que integra tecnología descentralizada, comercio electrónico e inclusión financiera en un solo ecosistema digital.

San Salvador, 3 de abril 2025

Linework, la innovadora empresa italiana de tecnología financiera descentralizada, ha decidido trasladar toda su operación a El Salvador, marcando un hito significativo para el ecosistema económico local. La compañía prevé contratar cerca de 1000 personas en el país para el cierre de 2025, incluyendo profesionales en desarrollo web, finanzas, contabilidad, brokers, traders, especialistas en desarrollo de negocios, abogados, recursos humanos, ventas, y operaciones. Además, Linework tiene proyectada la construcción de un impresionante edificio corporativo de 71 niveles en el país, de la mano de DOMA Arquitectos, una reconocida firma en el rubro, consolidando su presencia en la región.

Desde su fundación en 2020 por Noel Damien y Benoit Foti, en Montecorvino Rovella, Linework se ha destacado por crear un ecosistema financiero inclusivo, beneficiando a todos sus usuarios alrededor del mundo. Linework es la única empresa que permite adquirir productos del mundo real por medio de tecnología descentralizada, convirtiéndose en un verdadero protagonista en la industria fintech. Su llegada al país promete transformar la manera en que los salvadoreños interactúan con las finanzas digitales, combinando blockchain, comercio electrónico y redes sociales descentralizadas en una sola plataforma. Acercando las criptomonedas al mundo real.

La visión de Linework se basa en la democratización financiera y el desarrollo sostenible. La compañía opera

Noel Damien, fundador de Linework, lidera la revolución de las finanzas descentralizadas con la llegada de la empresa a El Salvador.

en más de 52 países y ha diseñado una tecnología propia, libre de intermediarios y compatible con la mayoría de los proveedores de tecnología descentralizada. Su modelo de negocio integra las funcionalidades de gigantes como Amazon, PayPal, WhatsApp, permitiendo a los usuarios comprar, vender, comunicar y gestionar sus negocios sin restricciones ni costos iniciales. De manera autónoma y segura.

Como un hito dentro de nuestra historia en Linework

logramos una ronda de inversión valorada en 1300 millones USD. Esta inversión, liderada por el NISITAPI Sovereign Bank (NSB), esto forma parte de una expansión estratégica que eleva el capital total de Linework a \$2.25 mil millones de dólares.

¿Por qué usar Linework?

Marketplace seguro y privado

- **Seguridad:** Linework protege al comprador y
